WinDateChanger Free Download [March-2022]

WinDateChanger is a freeware utility that allows you to set the date and time of the created, modified and accessed date of a file.

The program offers two windows: the main window and the properties window. The first window is where you'll find the different options, settings and controls for your application. All of these options can be edited in a combo box or by clicking directly on the windows controls. There are three tabs in the main window: Date, Time and Files. The Date tab has the fields for the created, modified and accessed date and time, while the Time tab contains the settings related to the time of creation, modification and access. The Files tab displays the list of all the files you have in the hard drive, and allows you to filter them and set the timestamps. After you have chosen what you want to change, you'll notice a

confirmation message, as well as the date and time displayed in the date and time of the created, modified and accessed properties of the files. Just leave it open, when the new day comes, the whole folder gets updated. No more double downloads, no more waiting. Quite useful. Have not tried it yet, but I hear you. It is like magic, don't you think? It will save you a lot of time and bandwidth. Its more than simple, its a FREE utility. Yes, it is. Its also useful. I've been using this for years on various machines and it's nice to have another option with some unique features. I'm always afraid to use this on a shared drive (or HD for that matter), but on my own personal computer, it works a treat. Have used it for years, never has it given me trouble. You can use a lot of features. I've used it for years, never has it given me trouble. Excellent utility, especially if you have a lot of files to do. This is cool! Works like magic. I've used this for years, never has it given me trouble. However I'm aware of the old FTP protocol and how it works. I've used this for years, never has it given me trouble. It actually detects the file types and changes their properties based on what extension you provide. This is cool! It allows you to change the modification date and time of a

WinDateChanger Crack [Latest-2022]

Date or time properties are used by software developers to describe an event. You can try to use the following files that should have changed date time. HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Explorer\FileExts*.* HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVer

sion\Explorer\FileSystems*.* HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Save HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Run HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunOnce HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunOnceW HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunOnceEx HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunOnceExW HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunOnceExWZ HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Uninstall HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunEx HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunExW HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\RunExWZ Note that it will not update the last access, modified, and created. A: I think the following site is the one you are looking for. C:\Users\%USERNAME%\AppData\Roaming\Microsoft\Windows\Recent\Programs Here's an example. The contents of the above file are: C:\Users\Zach\AppData\Roaming\Microsoft\Windows\Recent\Programs

WinDateChanger Crack + PC/Windows

WinDateChanger is a free and open-source tool that gives you with the possibility to quickly apply new file properties when it comes to the date and time of creation, last modification, and last access. The Softpedia downloaded package includes a standard setup executable file and a Microsoft Installer package. Just keep in mind that you must have NET Framework 2.0 installed, in order for this app to work properly. After the setup operation is done, you can check out the source code, as well as run the executable file. Built from a standard form, the interface lets you open file and instruct the application to automatically identify and display its current timestamps when it comes to the created, modified and accessed date and time. These properties can be edited by consulting a calendar or by directly entering the new numerical values in the dedicated boxes. Changes will be committed to the file after pressing the "Write" button. WinDateChanger doesn't offer support for batch processing, so it's possible to alter date and time parameters for only file at a time. Confirmation messages pop up after reading and writing a file. BEIJING, April 18. /TASS/. The Chinese government called a family meeting in the southwestern province of Yunnan to discuss the issue of the country's 18-year-old boy having contracted HIV from a sex partner. The boy was tested after the latest outbreak of HIV in Yunnan that has reportedly affected about 150 people. The results came back positive, but the

case was only reported last week. The Yunnan-based United Front Work Department that deals with counter-terrorism and counter-proliferation issues said the family had been summoned for the "rapid response" meeting. "As a parent, I hope that all parents would like to do everything they can for their children," the official said. On April 11, the central government said that the young man in Yunnan was "put into contact with an HIV-positive male" and had been undergoing treatment. On April 6, the Chinese authorities said that the country had records on about 750 thousand people living with HIV. About 400 thousand of them were children. Yunnan, the second most populous province in China, has recently been rocked by the HIV outbreak that reportedly affected 150 people. There are roughly 70,000 people living with HIV

What's New in the WinDateChanger?

Edit file or folder properties using a standard form. Introducing the most modern and intuitive interface in the category. A calendar is available in the main window, where the new date and time properties can be set. Customize the look and feel of the interface, the buttons, and also the calendars. Unlimited number of applications - in one package. In addition to C# source code, the package comes with a Windows Installer. There is also a free community edition available. Support and documentation available at: [Community feedback and help available at:](#) - * The displayed software features may vary with different system configurations and/or different installed components. * The

displayed software features may vary with different system configurations and/or different installed components. + * "WinDateChanger 17 is not compatible with Windows 8 and Windows Server 2012." + * "WinDateChanger 17 is not compatible with Windows 8 and Windows Server 2012." - [[Category:Windows software]] [[Category:Windows software]] + [[Category:CSharp software]] Latest revision as of 00:05, 27 February 2013 Intended for advanced users and written in C#, WinDateChanger is a free and open-source application that gives you with the possibility to quickly apply new file properties when it comes to the date and time of creation, last modification, and last access. The Softpedia downloaded package includes a standard setup executable file and a Microsoft Installer package. Just keep in mind that you must have .NET Framework 2.0 installed, in order for this app to work properly. After the setup operation is done, you can check out the source code, as well as run the executable file. Made from a standard form, the interface lets you open file and instruct the application to automatically identify and display its current timestamps when it comes to the created, modified and accessed date and time. These properties can be edited by consulting a calendar or by directly entering the new numerical values in the dedicated boxes.
