What's New In?

MBSwapper is an

application that can swap mouse buttons. It is a small portable application that can be packed on a USB stick and run from any system without any software installation required. It is a free program and it is in the public

domain. Usage: Just select the mouse buttons you want to swap in the list, click on "Swap", and then on "Apply". Known bugs and issues: Mouse button 1 is swapped with button 3 in Windows 7 There is a known issue with the

windowed version where the buttons swap back to the first state after the swap is done. Other notes: The first time you run MBSwapper, it will ask if you want to run from the usb stick. You are free to answer "yes" or "no".
